Δημοσιεύσεις του Δημητρίου Αραμπέλου

List of publications Prof. Dr.-Ing. D.N. Arabelos

I. Books:

Arabelos, D.:
- **Gravimetry - An Introduction.**
  Ziti Publishing, Thessaloniki 1985 (in Greek).

Arabelos, D.:
- **Geophysical Prospecting.**

Arabelos, D.:
- **Gravimetry.**
  Ziti Publishing, Thessaloniki 2000 (in Greek).

Arabelos, D.:
- **Introduction to Potential Theory.**
  Ziti Publishing, Thessaloniki 2002 (in Greek).

Arabelos, D. and I.N. Tziavos:
- **Introduction to the Gravity Field of the Earth.**
  Ziti Publishing, Thessaloniki 2007 (in Greek).

Arabelos, D.:
- **Introduction to Potential Theory. 2nd Edition,**
  Ziti Publishing, Thessaloniki 2007 (in Greek).

II. Research papers

Torge, W., L.N. Mavridis, H. Drewes and D. Arabelos (1975):
- **Establishment of a High Precision Gravity Network in the Eastern Mediterranean.**
  Presented at the *XVI General Assembly of the IUGG-IAG*, Grenoble, France.

Torge, W., L.N. Mavridis, H. Drewes und D. Arabelos (1976):
- **Anlage eines Schwerenetrizes hoher Präzision im Bereich der Ägäischen Platte.**

- **Photoelectric observations of the flare star UV Cet in 1973.**
Arabelos, D., G. Kareklidis, L.N. Mavridis and D.C. Stavridis (1978):

**Photoelectric observations of the flare star EV Lac in 1973.**

**The Gravity Field of Northern Greece. I. Eastern Macedonia and Western Thrace.**
*Proceedings, Academy of Athens*, 55, 372-381.

**The Gravity Field of Northern Greece. II. Western Macedonia.**
*Proceedings, Academy of Athens*, 55, 419-428.

Untersuchungen zur gravimetrischen Geoidbestimmung, dargestellt am Testgebiet Griechenland.

*Wissenschaftliche Arbeiten der Fachrichtung Vermessungs-wesen der Universität Hannover*, Nr. 98, S. XIV+151, Hannover.

Torge, W., L.N. Mavridis and D. Arabelos (1981):

**High-Precision Gravity Network in the Aegean Region.**

Zur Schätzung von Anomalie - Gradvarianzen aus lokalen empirischen Kovarianzfunktionen.

**Gravimetric Geoid Determination for the Area of Greece.**

Arabelos, D., I. Karrinti and L.N. Mavridis (1982):

**Establishment of a First Order Gravity Network in Northern Greece.**

**Establishment of a high-precision gravity network in the area of Eastern Macedonia.**

**Determination of Deflections of the Vertical Using a Combination of Spherical Harmonics and Gravimetric Data for the Area of Greece.**
*Bulletin Géodésique*, 57, pp. 240-256.

Evaluation of Deflections of the Vertical Using Topographic-Isostatic and Astrogeodetic Data for the Area of Greece.

A Comparison of two Methods to Compute Degree Variances of the Gravity Field.
Manuscripta Geodaetica, 12, pp 223-237.

Merging Regional Geoids- Preliminary Considerations and Experiences.
Bollettino di Geodesia e Scienze Affini, N. 3.

Computation of the Gravity Vector from Torsion Balance Data in Southern Ohio.

Covariance and Bias Treatment when Combining Gravimetry, Altimeter and Gradiometer Data by Collocation.

Analysis of a Geodetic Network Using Products of Legendre and Hermite Polynomials for Detecting Real Crustal Movements.
Geophysical Journal International, 93, pp. 559-564.

Gravity Field Approximation in the area of Greece with emphasis on local characteristics.
Bulletin Géodésique, 63, pp. 69-84.

The Hellenic geoid - new considerations and experiences.
Ricerche di Geodesia Topografia e Fotogrammetria, Miscellanea per il 70' di Giuseppe Birardi, pp 1-20, Milan.

Die verallgemeinerte Transformation ebener Koordinaten.
Zeitschrift für Vermessungswesen, 12, S. 573-575.
Arabelos, D. and I.N. Tziavos (1990):  
Sea surface heights in the Mediterranean sea from GEOSAT altimeter data.  

Arabelos, D., I.N. Tziavos and R. Forsberg (1990):  
Sea surface height determination in the Mediterranean Sea by local adjustment of GEOSAT altimeter data.  

Arabelos, D. and C.C. Tscherning (1990):  
Simulation of regional gravity field recovery from satellite gravity gradiometer data using collocation and FFT.  
*Bulletin Géodésique*, 64, 363-382.

Estimation of the gravity field and sea surface heights from heterogeneous data in the Central Mediterranean.  

Estimation of disturbing potential components and comparison with GPS and astrogeodetic data.  

Analysis of GEOSAT altimeter data.  

Improvement of the accuracy of the LaCoste-Romberg Model G gravity meter with an electronic feedback.  

**Gravity anomalies and deflections of the vertical from airborne gravity gradiometer data.**

*Presented at the IAG meeting GM3.3 (Section III) Gravity Field Determination and Related Problems, XX General Assembly IUGG, Vienna, 11-24 August 1991.*

**The GEOMED Project.**

**Geoid mapping in the Mediterranean Sea using heterogeneous data.**

**Gravity field approximation using airborne gravity gradiometer data.**

*Journal of Geophysical Research, 97, B5, 7097-7108.*

**Tidal effects on satellite altimetry data in closed sea area.**

**Altimeter data from ERS-1 in the Mediterranean Sea.**

**The gravimetric geoid and the SST in the Eastern Mediterranean.**

**Validation of ETOPO5U in the Hellenic area.**

*Bull. Géod. 68, 88-99.*

**Regional recovery of the gravity field from SGG and SST/GPS data using collocation.**

xix

**Crossover analysis of ERS-1 altimetry in the Mediterranean Sea and inversion of the adjusted data to recover gravity anomalies.**

**Tidal corrections of the ERS-1 satellite altimeter data in the Mediterranean Sea.**

**Geoid Solutions in the Mediterranean Sea by different methods.**

**Geoid modelling and comparisons with GPS and satellite altimetry in the Hellenic area.**

**Crossover analysis of ERS-1 altimetry in the Mediterranean Sea and inversion of the adjusted data to recover gravity anomalies.**

**Geoid solutions in the Mediterranean Sea by different methods.**

**Analysis of ERS-1 and TOPEX altimeter data in the Mediterranean Sea.**

**The use of an outlier detecting method in time series of continuous daily measurements of underground water level and temperature in earthquake prediction investigation.**

A study of deformation system of crustal layer-block structure in the
northern North China seismic region.
National Tectonic Conference, April 22-25, Beijing, 1994.

Geoid computations in Taiwan.
Presented at the IGC/ICG joint Symposium, Graz, Austria, Sept. 11-17, 1994.

Gravity and geoid in the Mediterranean from a common adjustment of
ERS-11 and TOPEX altimeter data.
Presented at the IGC/ICG joint Symposium, Graz, Austria, Sept. 11-17, 1994.

The contribution of bathymetry to gravity field modeling.
Proceedings INSMAP 94, pp. 114-123.

Comparisons of the global ETOPO5U model with local DTMs.

Marine geoid solutions by spectral and stochastic techniques-Examples for
the Mediterranean Sea.
Proceedings of the INSMAP 94, pp 177-188.

Recent results of the GEOMED project.

Arabelos, D., G. Asteriadis, M.E. Kontadakis, H. Sahsamanouglou, S. D. Spatalas
(1994):
Tidal changes of the barometric pressure in the area of Thessaloniki.
2nd National Conference on Meteorology, Climatology and Physics of the At-

Regional recovery of the gravity field from SGG and gravity vector data
using collocation.
Journal of Geophysical Research, 100, B11, 22,009-22,015.

Calibration and optimisation of the frequency content of a combined solu-
tion.

**Atmospheric tides in the area of Thessaloniki.**

**The study of the changes in the underground water level and temperature as earth-quake related phenomena in an active seismic zone in Thessaly in Central Greece.**
*Presented at the XX General Assembly of EGS*, Hamburg, April 3-7, 1995, Session NH2 (Risk Evaluation and Mitigation in Regions Affected by Large Earthquakes).

**Gravity field improvement in the Mediterranean Sea by correcting the bottom topography using collocation.**

**Combination of ERS-1 and TOPEX altimetry for precise geoid and Gravity recovery in the Mediterranean Sea.**

Arabelos, D., M. Vermeer (1996):

**Gravity field Mapping from a combination of satellite altimetry and sea gravimetry in the Mediterranean Sea.**

**Geoid and tidal studies in the Mediterranean Sea.**

**Support of Spaceborne Gravimetry Data Reduction by Ground Based Data.**
*CIGAR IV Final Report*, Hans Sünkel (Ed), Graz, June, 1996.

**Collocation with finite covariance functions.**
Thermogravitational atmospheric tides in Thessaloniki area.

The study of the level and temperature variations of the underground water as precursory phenomena in the seismic area of South Thessaly.

The response of a shallow underground water level network in Thessaly, Central Greece, to tectonic and non tectonic stresses.

Research for seismic phenomena on the underground water level and temperature in Thessaly.

Equidistance ordering of large earthquakes (M > 7) in North China.

The results of a two years monitoring of a shallow underground water level network in Thessaly, Central Greece, for seismic precursory phenomena.

Research for preseismic phenomena on the underground water level and temperature in selected areas of Greece.

Atmospheric Tides in the area of Thessaloniki.

**Equidistance ordering of large earthquakes in North China.**

Arabelos D. and D. Rossikopoulos (1997):

**On the stability of the LaCoste-Romberg gravimeter scale factor.**

**Recent Geoid Computations in Taiwan.**
*Geomatics Research Australasia*, No. 65, pp. 43-58.

**Comparison of recent geopotential models with surface, airborne and satellite data in different areas of the earth.**
*International Geoid Service*, Bulletin No 6, pp 103-114, Milano.

**On the possibility to estimate ocean bottom topography from marine gravity and satellite altimeter data: An experiment in the central Mediterranean.**

The Earth and the Universe, *Volume dedicated to Prof. L. Mavridis on the occasion of his completing 45 years of Academic activities*, pp. 343-356, Ziti Ed., Thessaloniki.

**Gravity field improvement in the Mediterranean Sea by estimating the bottom topography using collocation.**

**The use of least squares collocation method in global gravity field modelling.**

**Calibration of Satellite Gradiometer Data Aided by Ground Gravity Data.**

**Computer supported cooperation - the future of the IAG Information Service and of cooperation within IAG.**

A new high resolution geoid for the Iberian Atlantic continental shelf area.

Equidistance ordering of large earthquakes in Aegean and surrounding areas.

On the possibility to estimate ocean bottom topography from marine gravity and satellite altimeter data using collocation.

Arabelos, D., C.C. Tscherning (1999):
Gravity field recovery from airborne gravity gradiometer data using collocation and taking into account correlated errors.

Arabelos, D., C.C. Tscherning (1999):
Improvements in vertical datum control to be expected from the GOCE mission.
*Presented at the XXIV General Assembly of the EGS*, The Hague, 19-23 April, 1999.

Refinement of the current Observation Requirements for GOCE.

Intercomparisons of the global DTMs ETOPO5, TerrainBase and JGP95E.

Mean sea level studies in the Aegean Sea.

Tscherning, C.C., D. Arabelos (2000):
A study of the correlations between spherical harmonic coefficients and point related quantities.
*XXV General Assembly of the EGS*, Nice, France April 2000.
Scientific data processing algorithms - the space-wise approach.

Detailed scientific data processing using the space-wise approach.

The 1-cm geoid after GOCE.

Arabelos, D., C.C. Tscherning (2001):
Improvements in height datum transfer expected from the GOCE mission.
Journal of Geodesy, 75, 308-312.

Comparison of Earth-tide parameters over a large latitude difference.
Geophys. J. Int. 151, 950-956.

The use of an outlier detecting method in time series of continuous daily measurements of underground water level and temperature in earthquake prediction investigation.

Calibration of Satellite Gradiometer Data by Ground Gravity Data.

Globally covering a-priori gravity covariance models.
Advances in Geosciences, 1:143-147.

Arabelos, D., P. Papaparaskevas (2003):
Estimation of error covariance functions using gravity gradiometer data and surface gravity data.

Atmospheric tide disturbances as earthquake precursory phenomena.
Tscherning, C.C. and Arabelos, D.N. (2004):  
**Computation of a geopotential model from GOCE data using fast spherical collocation - A simulation study.**  

**Atmospheric tides in the area of Thessaloniki-North Greece. A twenty-seven years data analysis.**  

**Atmospheric tides in the area of Thessaloniki-North Greece. A twenty-seven years data analysis. From Stars to Earth and Culture, *Volume dedicated in honour of the memory of Professor A. Tsioumis*.**  
A. Dermanis (Ed), Publishing Ziti, Thessaloniki.

**Disturbances in thermogravitational atmospheric tides during the strong earthquake of Volvi, North Greece in 1978.**  
*Proceedings, 5th International Symposium on Eastern Mediterranean Geology, Thessaloniki, Greece, 14-20 April, 2004.*

**GPS monitoring of ionospheric TEC over the area of Thessaloniki in order to detect disturbances related to the local tectonic activity.**  
*Presented at the 1st General Assembly of the European Geosciences Union, Nice, France, 25-30 April 2004.*

**Study of the Correlation between seismicity and barometric tidal exalting.**  
*Presented at the 1st General Assembly of the European Geosciences Union, Nice, France, 25-30 April 2004.*

**Local vertical crustal movements in the Mygdonian basin-North Greece, resulting from gravity measurements.**  
*Presented at the 1st General Assembly of the European Geosciences Union, Nice, France, 25-30 April 2004.*

**Local vertical crustal movements in the Mygdonian basin-North Greece, resulting from gravity and GPS measurements.**  
Arabelos, D., C.C. Tscherning (2005):
External calibration of GOCE SGG data with terrestrial gravity data.
Doc. No. GO-TN-HPF-GS-0070, Prepared by The European GOCE Gravity
Consortium, EGG-C.

Arabelos, D.N., C.C. Tscherning and M. Veicherts (2005):
External calibration of GOCE SGG data with terrestrial gravity data. A
simulation study.

Calibration of GOCE gravity gradient data using smooth ground gravity.
Proceedings of the Workshop GOCINA: Improving modelling of ocean trans-
port and climate prediction in the North Atlantic region using GOCE gravim-
etry. P. Knudsen, J. Johannessen, T. Gruber, S. Stammer and T. van Dam (Eds),

Geoid, mean sea level and ice thickness in the Arctic Ocean from GRACE

Arabelos, D.N., G. Asteriadis, M.E. Contadakis, D. Papazachariou & S.D. Spatalas
(2005):
Assessment of recent tidal models in the Mediterranean Sea.

Forsberg, R., Skourup, H., Andersen, O., Knudsen, P., Laxon, S.W., Ridout, A.,
Arctic Ocean geoid, ice thickness and mean sea level-The Arcgice Project.

Error covariance estimates in the Arctic Ocean.
EGU General Assembly, Vienna, Austria, 2-7 April, 2006.

Contadakis, M.E., D. Arabelos, G. Asteriadis, Ch. Pikridas, S. Spatalas, M.
Chatzinikos (2006):
Observational investigation of ionospheric turbulent spectral content in
relation to geomagnetic field variations and local seismicity.
EGU General Assembly, Vienna, Austria, 2-7 April, 2006.

Correlation between seismicity and barometric tidal exalting.
Presented at 3rd Annual Meeting of the Asia Oceania Geosciences Society,

xxviii

**Moho depths in the Indian Ocean based on the inversion of Satellite gravity data.**

*Presented at 3rd Annual Meeting of the Asia Oceania Geosciences Society, Singapore 10-14, July, 2006.*

**On a strategy for the use of GOCE gradiometer data for the development of a geopotential model by LSC.**

Arabelos, D.N., R. Forsberg and C.C. Tscherning (2007):

**On the a priori estimation of collocation error covariance functions: a feasibility study.**

**Moho depths in the Indian Ocean based on the inversion of satellite gravity data.**

**Combination of Spaceborne, Airborne and In-Situ Gravity Measurements in Support of Arctic Sea Ice Thickness Mapping.**

*Technical report No. 7, Danish National Space Center.*

Arabelos, D.N. and C.C. Tscherning (2009):

**Error-covariances of the estimates of spherical harmonic coefficients computed by LSC, using second-order radial derivative functionals associated with realistic GOCE orbits.**

*J. Geodesy, 83, 419-430. doi: 10.1007/s00190-008-0250-9*

**Correlation between seismicity and barometric tidal exalting.**

*Nat. Hazards Earth Syst. Sci., 8, 1129-1137.*

**TEC variations over the Mediterranean during the seismic activity period of the last quarter of 2005 in the area of Greece.**

*Nat. Hazards Earth Syst. Sci., 8, 1267-1276.*

Arabelos, D.N. and C.C. Tscherning (2010): A comparison of recent Earth gravitational models with emphasis on their contribution in refining the gravity and geoid at continental or regional scale. J. Geodesy. doi:10.1007/s00190-010-0397-z.
